- Adaptability
- Strong Written and Verbal Communication
- Servant Leadership
- Agile Development Methodologies
- Attention to Detail

Bachelor of Science in Computer Science | Kennesaw State University 2025

Work Experience

Junior Software Engineer **Plume Security: Aug 2025 - Current**
Developing Windows Applications and other work

- Ongoing work as the primary developer for our windows platform applications utilizing C#
- Utilized tensorflow and keras to create a machine learning model that can detect when a file is encrypted and given a random file extension
- Made use of the ONNX to implement the ml model in Go
- Used Go to develop support for NetApp ONTAP NAS hardware

Software Engineering Intern **Plume Security: Summer 2025**
Developed Windows Applications

- Worked as the primary developer for our windows platform applications utilizing C#
- Implemented new features utilizing the Win32 api to collect forensic information about processes deemed to be ransomware to assist customers in post-attack cleanup

Software Engineering Intern **NCR Voyix: Summer 2024**
Member of company's Business Systems Layer team

- Worked on web development on https://developer.ncr.com/ redesigning the front end and improving the search experience
- Created multiple API endpoints interacting with our Elasticsearch database in the back end

Computer and Cellphone Repair Technician **Ginstar Computers: 2022-2023**
Built PCs for customers, diagnosed and repaired various electronics

- Replaced phone and tablet screens
- Set up MacOS and Windows machines for customers
- Performed necessary repairs to get customer machines working again

Team Leader **Glisson Camp and Retreat Ministries: Summer 2022, 2023**
Led and supported teams of rising college freshmen and camp counselors to ensure smooth daily camp operations

- Assisted in conflict resolution involving staff members and campers
- Collaborated with leadership teams to maintain a safe, organized, and positive camp environment
